STEELART

Exclusive sinks in exceptional pared-down design and small series. Made-to-measure stainless steel worktops based on your wishes. That's BLANCO STEELART. The versatile product programme from BLANCO's high-tech production facility appeals for its simple aesthetics and unique matching geometries, and consistently sets new design trends in the living world of the kitchen.

Stainless Steel – The Material

Stainless steel is often called the preferred material of discerning product designers and kitchen planners. Its unique material properties make this elegant material the first choice for the highest standards in high-end and exclusive design. But what exactly is behind this all-rounder?

We have compiled the most relevant information for you in this piece:

Recyclable: Stainless steel is a natural, environmentally friendly material that is 100% recyclable. This means that all items made of stainless steel can go back into the production of new materials at the end of their life cycle.

Corrosion-resistant: BLANCO uses the highest stainless steel quality that consists mainly of iron (72%), chrome (18%) and nickel (10%). This composition makes it resistant to corrosion.

Anti-Rusting: Stainless steel does not rust. Any rust marks that appear on the surface are from other sources. This rust is an oxidation of deposited foreign materials.

Self-renewing: Stainless steel constantly renews itself. In fact, it is said to have a self-healing surface, also called the passive layer. If the surface is damaged, oxygen helps it to renew itself. This is always of benefit to the material in daily use.

Durable: Thanks to the zoning of the passive layer, there is no need for corrosion protection. As a consequence, stainless steel retains its value and brilliance for decades.

SURFACE FINISHES.

STEELART worktops are available in three surface finishes with different degrees of gloss.

Stainless steel satin polish

Top: finish stainless steel satin polish
Bottom: cross section satin polish, finely brushed stainless steel

Stainless steel satin matt

Top: finish stainless steel satin matt
Bottom: cross section satin matt, sand-brushed stainless steel

Stainless steel Durinox®

Top: finish stainless steel Durinox®
Bottom: cross section Durinox®, shot-blasted stainless steel

IN DAILY USE.

Lots of materials are harder than stainless steel, such as ceramic, stone, glass or hardened metals, as are scouring detergents. All of these materials can scratch a stainless steel surface if applied mechanically.

Complete scratch resistance is not achievable by today's technical standards, so the appearance of minor signs of usage is entirely natural. For instance over time, stainless steel satin polish gets a so-called patina, which becomes less and less sensitive with regular polishing.

Edelstahl Durinox®:

The hardened Durinox® surface is more than twice as hard as conventional stainless steel worktops, which makes it extremely resistant to scratches.

Stainless steel satin polish and satin matt: Due to its smooth structure, the finely brushed satin polish surface is extremely easy to clean – in fact, it is the easiest of all the options.

THE ADVANTAGES.

- The material properties prevent rust from forming
- Hygienic and food neutral: the smooth metallic surface of the stainless steel makes it extremely difficult for bacteria and micro organisms to settle and multiply. It does not affect the taste or appearance of any foods that come into contact with it.
- Lightfast and stain resistant
- Strong and elastic against blows, drops and wear. Dropped items do not break so readily.
- Joint-free worktops: the smooth integration of bowls, sinks and hobs offers the maximum in hygiene, and also results in an elegant appearance "as if cast in one piece".
- Creative freedom and design: there are no limits for aesthetes thanks to the perfect formability of the material. Flowing shapes and transitions, flat rims and rounded lines clearly demonstrate the design versatility of this material.
- Versatile in combination: Thanks to its neutral colours, stainless steel will blend harmoniously with any kitchen environment.
- Easy to clean and care for: the minimum care is all that is required for stainless steel to retain its value and brilliance even after decades.

Optimum space utilization for more comfort:

BLANCO offers solutions for any size of sink cabinet. A cabinet width of 60 cm is ideal for sinks with a main and additional bowl, but there are also numerous models for other spatial and planning situations.

- **Ergonomics and functionality make everything easier:**
The bowls and accessories are designed to match each other perfectly and make work-sequences flow smoothly.
- **Comfort in a system:**
It is the perfect interplay between sink, mixer tap, waste system and accessories that creates a functional sinkcentre.
- **Material and colour add highlights:**
The right combination of sink and mixer tap creates an ambience that matches any home living style.
- **Mixer taps by BLANCO:**
BLANCO offers a wide selection of designs of high functionality. Certified in accordance with the strict quality criteria of independent test institutes, they meet the highest requirements for safety and hygiene.
- **Cleaning made easy:**
The surfaces of sinks and mixer taps are wonderfully easy to clean. Special materials help to repel dirt and water.

Cleaning And Care (Stainless Steel Satin Polish / Satin Matt).

1. Deep clean (satin polish finishes only):

We recommend cleaning and maintaining the surface with BLANCO POLISH every 1-2 weeks.

BLANCO POLISH makes daily cleaning much easier, and removes heavy dirt and limescale deposits. It seals the surface, giving it a self-cleaning effect, and also removes minor signs of use.

BLANCO POLISH:

- Removes scratches
- Removes rust and stains
- Water just rolls off the surface after use
- Prevents finger prints and other marks and dirt from settling
- Leaves a silky-matt shine

BLANCO STEELART care set:

- 1 x BLANCO microfibre cloth
- 1 x BLANCO POLISH
- 1 x Vileda sponge, non-scratch

2. Daily cleaning: All that is required for daily cleaning is a soft sponge or damp microfibre cloth and normal commercial cleaning detergent. You can also use vinegar or lemon cleaner to remove limescale.

BLANCO household tip: Clean with vinegar water (20% vinegar, 80% water) or with lemon juice diluted in water.

Special information

- Always clean in the direction of brushing, and never use circular movements as this could result in permanent changes to the surface texture.
- Intensive polishing in one spot will result in local changes to the degree of sheen (especially on satin matt)
- Avoid chlorine and hydrochloric acid-based cleaning products
- Remove dirt and limescale deposits regularly
- Avoid direct, prolonged contact with rusting iron objects (e.g. cast iron pans)
- Never use steel wool, only sponges for stainless steel (soft side)

Cleaning And Care (Stainless Steel Durinox®).

1. Deep clean for Durinox® finishes:

We recommend deep cleaning the worktop before using it for the first time, and then every 3 – 4 weeks.

1. Pour a little undiluted BLANCO Durinox® Liquid onto a soft sponge (e.g. stainless steel sponge by VILEDA).

2. Clean the worktop using circular movements and light pressure on the surface.

3. Then remove all traces of the cleaner and the loosened dirt from the stainless steel surface with a wet microfibre cloth and plenty of water.

4. Dry the worktop with a clean cotton or microfibre cloth.

2. Daily cleaning:

All that is required for daily cleaning is a soft sponge or damp microfibre cloth. To treat limescale and light dirt, use BLANCO Durinox® Liquid, vinegar or lemon cleaner.

BLANCO Durinox® Liquid is a special deep cleaner. It removes heavy dirt and limescale deposits, and makes daily cleaning much easier.

To obtain care products for STEELART stainless steel worktops look up online at www.blanco-germany.com

BLANCO Durinox® Liquid:

- Loosens rust and stains
- Makes it easier to remove fingerprints

BLANCO Durinox® Care Set:

- 1 x BLANCO microfibre cloth
- 1 x BLANCO Durinox® Liquid 250 ml
- 1 x Vileda sponge, non-scratch

Special information

Do not use any abrasive scouring powders (e.g. scouring milk, scouring powder, BLANCO POLISH) to clean BLANCO Durinox® stainless steel surfaces.

BLANCO STEELART

Exclusivity in stainless steel.

BLANCO
STEELART

The exclusive BLANCO FLOW inset sink is in a clear, balanced design that instantly soothes the eye of the observer.

The innovative stainless steel BLANCO Durinox® surface appeals for its particular hardness that makes it particularly resilient to scratches.

BLANCOCULINA-S Mini

BLANCO ATTIKA 60/A. Exclusive elegance.

The innovative STEELART sit-on bowl with the elegant and exclusive ATTIKA frame appeals for its filigree yet solid looks and gentle contours. The tap ledge is lower at the sides to create a closed unit of bowl and control elements.

In combination with a retractable mixer tap, BLANCO ATTIKA is also suitable for window installation.

The matching ash compound chopping board acts as an elegant system cover.

BLANCO ATTIKA 60/A

Stainless steel satin polish Sublime elegance

- Lay-on bowls with an elegantly raised ATTIKA frame
- Unique rim geometry: a delicate yet solid look with gentle contours
- An integrated BLANCO CLARON XL single bowl
- The lowered mixer tap ledge on the side makes an enclosed unit of the bowl and control elements
- Can be installed reversibly
- Optional: a matching ash compound chopping board as an elegant system cover

BLANCO ATTIKA XL 60 and 60-T. Exclusive elegance for individual tastes.

An elegant extension to the STEELART family of sit-on bowls is the BLANCO ATTIKA XL single bowl with the exclusive ATTIKA frame.

In combination with the matching draining bowl and walnut compound bridge chopping board, it becomes the perfect preparation zone. The chopping board can be inserted both in the bowl and in the flat draining bowl.

The flat BLANCO ATTIKA drainer bowl is the perfect preparation zone.

The chopping board can be inserted both in the bowl and in the flat drainer bowl.

BLANCO FLOW-IF.

The flowing connection in stainless steel

The design award-winning BLANCO FLOW-IF sink centres appeal for their flowing transitions and unique shapes. The unusual design is particularly evident in the smoothly tapering drainers that merge seamlessly with the flat IF rim.

Perfect match: the BLANCO LINEE-S mixer tap in a stainless steel satin polish finish.

The symmetrical shape with the central CLARON bowl will make the sink the focal point in any kitchen.

Elegant, seamless transitions are key features of the exclusive design of BLANCO FLOW sinks.

BLANCO JARON. The art of symmetry.

The BLANCO JARON inset sink by STEELART is in a clear, balanced design that instantly soothes the eye of the beholder.

The two symmetrical areas with bowl and drainer are elegantly connected to each other by the tap ledge in the middle. The perfect frame around the sink centre is the flat IF rim with gently rounded, parallel corner contours that are matched perfectly to the bowl geometry.

The symmetrical design and the new drainer outflow in the elegant C-overflow™ design enhance the exclusive character of the inset sink.

Both the elegant walnut compound chopping board and the IF flat rim are matched perfectly to BLANCO JARON's bowl geometry.

BLANCO JARON XL 6 S-IF

Stainless steel satin polish
The art of symmetry

- Sink with clear, balanced appearance
- Symmetrical design with central positioned tap ledge
- Surrounded by elegant IF flat-rim
- Integrated BLANCO CLARON bowl
- Optional accessory: versatile placeable walnut compound chopping board perfectly matching the bowl geometry
- For reversible use

BLANCO STEELART.

Exclusive variety for all installation methods.

The design-based inset programme with IF flat rim

These hand-made inset programmes are notable for the pared-down linearity of their design language and the filigree IF flat rim.

BLANCO FLOW-IF – inset and flushmount

BLANCO FLOW-IF appeals for the flowing transitions in an exceptional, symmetrical design. Draining surfaces, tapered on both sides, border the central CLARON bowl.

BLANCO JARON-IF – inset and flushmount

The inset sink BLANCO JARON appeals for its clear, balanced design. The two symmetrical areas with bowl and drainer are elegantly connected to each other by the tap ledge in the middle.

BLANCO CLARON-IF – inset and flushmount

The inset family appeals for the striking corner radii of 10 mm and the IF flat rim. The innovative draining surface blends smoothly with the sink for superb contours.

BLANCO ZEROX-IF – inset and flushmount

The zero radius inset family with the striking X. Visually appealing: the right-angled drainer emphasises the exclusive appearance of these hand-made designs.

Bowls and sinks for undermount, inset and flushmount installation

Two bowl lines with a consistency of design that sets new standards: BLANCO ZEROX and BLANCO CLARON in a clear design language.

BLANCO CLARON – undermount, inset and flushmount

The sink programme with the striking high-tech bowl radii of just 10 mm. The small radii and special depth of the bowl provide for perfect space utilisation.

BLANCO ZEROX – undermount, inset and flushmount

The sink programme in the striking, right-angled zero radius design. Visual feature: the base of the bowl forms an X, emphasising the linearity of the sink geometry.
