AQUASYS RANGE OF LIGHT MIRRORS

MULTI-FUNCTIONAL CONVENIENCE

HÄFELE

ABOUT

Give your designs the perfect touch in the bath, vanity or closet areas with Häfele's Aquasys Range of Light Mirrors, consisting of the Aquasys, Aquasys X+ and Aquasys X Series. Beautifully designed, the mirrors add value, functionality and style to any interior space.

The versatile mirrors come fully assembled and unite the functions of make-up lighting, room lighting and mood lighting in an elegant design. The front light, in natural and warm white, equipped with a memory function offers excellent colour trueness that exceeds the market colour rendering indexes making it very suitable as a make-up light. All functions are controlled via touch keys that are integrated into the mirror.

These mirrors are easy-to-install and come fully-assembled with a mounting track for installation. With the option to rotate the mirror by 90 degrees, they are a perfect fit for any interior décor or style.

The top-line models from the Aquasys Series within the Aquasys Range include mirrors that are equipped with an in-built demister (prevents condensation on the mirror during and after a shower) and a sound system. The remaining models from the Aquasys X+ and Aquasys X Series come either without the Demister or the Bluetooth Capable Transducer System or both.

HÄFELE

FEATURES

Bluetooth Capable Transducer System

- Plays music from your mobile on the sound system integrated into the mirror

Demister (Mirror Heater)

- Prevents the mirror from fogging up

Background Lighting

- Functions as a source of mood and ambient lighting
- Operates independently from the Front Lighting

Front Lighting

- Offers adjustable lighting option, from warm white to natural white
- Creates desired ambience from relaxing to invigorating
- Comes equipped with a memory function

Please Note: Not all models within the Aquasys Range of Light Mirrors include every feature mentioned above. Only the top-end models from the Aquasys Series within the Aquasys Range come equipped with all the four features. The remaining models come either without the Demister or the Bluetooth Capable Transducer System or both. For more information please refer to the next page.

RANGE OVERVIEW

The Aquasys Range of Light Mirrors consist of 3 series: **Aquasys, Aquasys X+ and Aquasys X.**

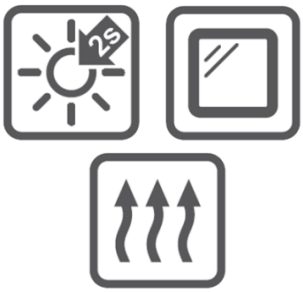
AQUASYS

The mirrors from the Aquasys Series are top-of-the-range models and come feature packed with the following:

- Front Lighting
- Background Lighting
- Demister (Mirror heater)
- Bluetooth Capable Transducer System

Application: Bathrooms

AQUASYS X+



The mirrors from the Aquasys X+ Series include mid-range models which have the following features:

- Front Lighting
- Background Lighting
- Demister (Mirror heater)

Application: Bathrooms

AQUASYS X

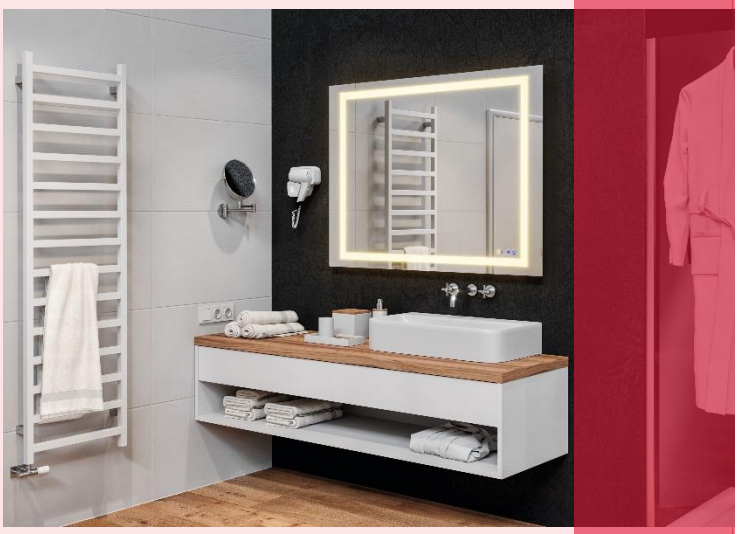
The mirrors from the Aquasys X Series provide economical options for those looking for mirrors with:

- Front Lighting
- Background Lighting

Application: Dressing Rooms, Living Rooms & Bathrooms

FUNCTIONALITY

1. Front Lighting

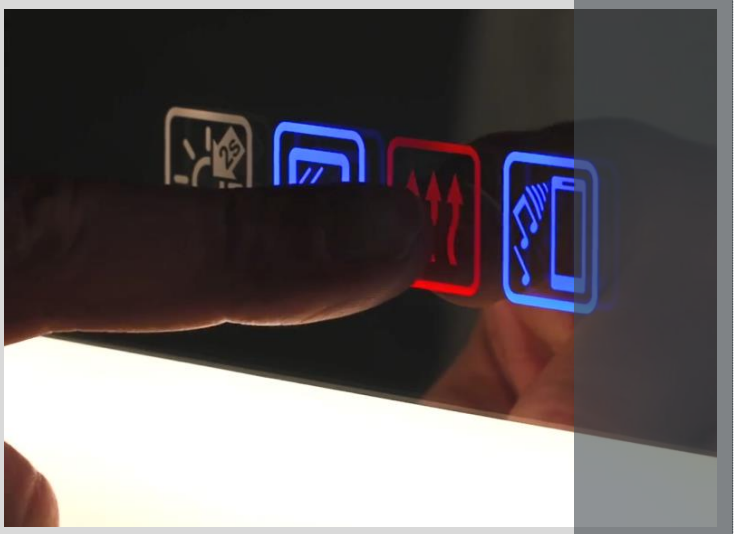


- The front lighting in the Aquasys Light Mirrors can be adjusted from Warm White (2700 K) which imparts a relaxing, spa-like aura to your interiors to Natural White (4000 K) which is ideal for applying make-up and getting ready
- The switch needs to be pressed for 1.5 - 2 seconds for the mirror to change the colour of the light
- The mirrors come equipped with a memory function where they remember the last light colour selected by you and bring that colour up when restarted
- The high quality front lighting (CRI >90) offers a realistic perception which is perfect for applying make-up and for use in the vanity area. The brightness also helps prevent the creation of shadows caused by the overhead ceiling lights

2. Background Lighting

- The background lighting, Warm White (2700 K), adds the much needed zing and drama to enhance the Aquasys Light Mirrors and a dimension of style and aesthetics to match the individualist grace of your homes
- The high quality lighting (CRI >90) augments the interior décor and complements the traditional walls of your homes effectively

3. Demister (Mirror Heater)

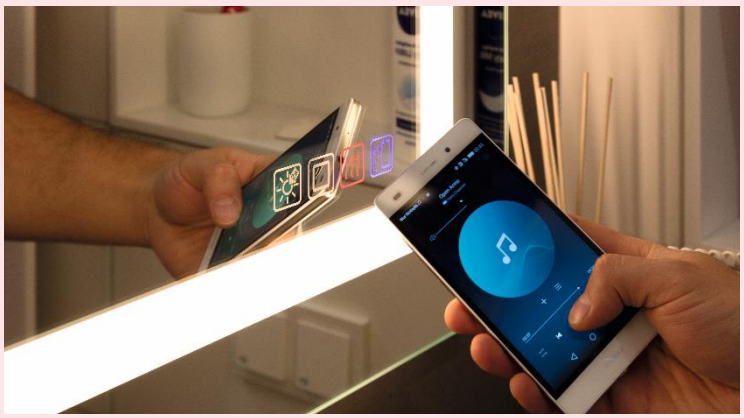


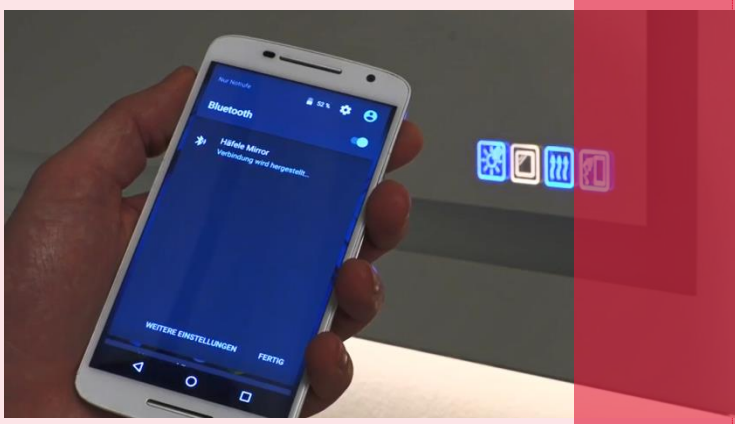
- The demisters built inside the Aquasys Light Mirrors heat up the glass surfaces to a temperature high enough to prevent the hot humid air from hot showers to condensate on the mirror glass surfaces
- They go on an automatic stand-by after staying active for 45 minutes in order to save energy

Please Note:

1. The mirror heater does not replace room heating
2. This feature is available only in the mirrors falling under the Aquasys and Aquasys X+ Series of the Light Mirror Range

4. Bluetooth Capable Transducer System





- The mirrors connect to smartphones via Bluetooth (Device Name: Hafele Mirror); all that needs to be done is to enter the set password (Password : 0000)
- They can save up to 2 users in their system and only one user can stay connected to a mirror at a time. The connection distance works up to 3-6 meters depending on wall construction
- The latest user will automatically connect to the mirror once in range, while the second user will have to connect manually after the latest user switches off his / her smartphone Bluetooth
- When a third user connects to the mirror, the first user will automatically get deleted from the system
- The inbuilt Transducer systems transform the mirrors into sound speakers to amplify the volume and the acoustic material inside the mirrors together with the wooden back plate further improve the sound performance

Please Note: This feature is available only in the mirrors falling under the Aquasys Series of the Light Mirror Range

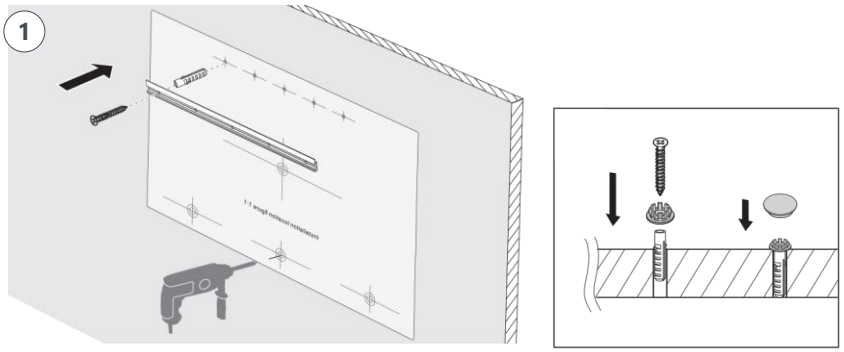
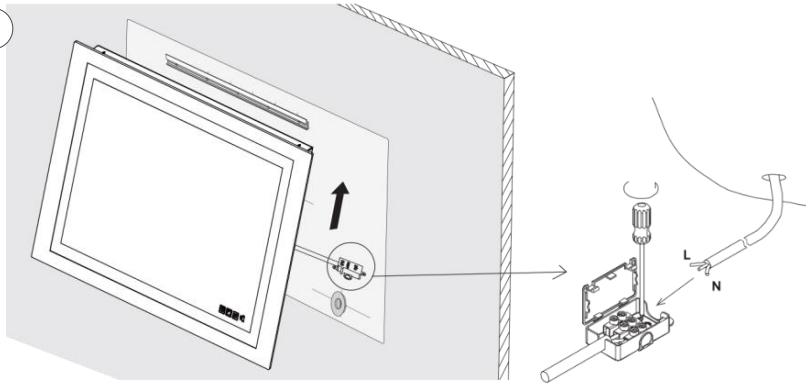
Installation Details

1



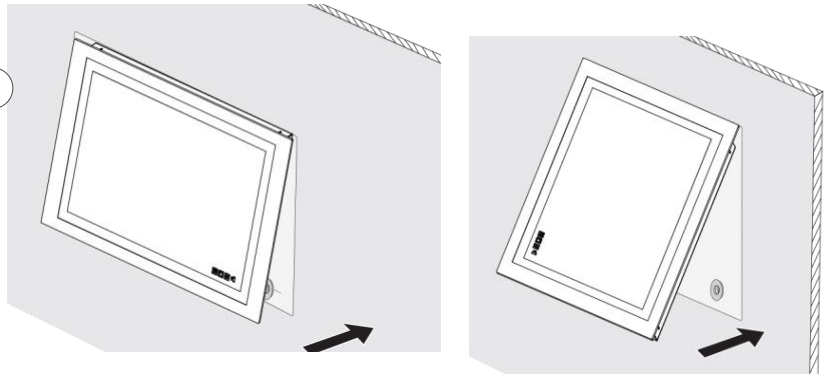
- Drill holes of ø8 mm as demonstrated in the drilling template and insert wall plugs into them
- Place the mounting profile parallel to the drilled holes and drill in the screws through the cover cap adapters and the mounting profile
- Once the profile is installed in position, fix the cover caps on top of the cover cap adapters

2



- Open the end terminal cap to connect the Live, Neutral & Earth wires
- Once connected, the end terminal box can be concealed or recessed into the wall or any furniture surface near the mirror.

3



- Hook on the mirror either horizontally or vertically onto the mounting profile
